

Wake Tech Community College Involvement

Leigh Dennis, Manager Fleet Services

The measure of a company's value to a community extends beyond the products and services that it provides. Community involvement, especially Carolina Sunrock's outreach to schools, has always been one of our President Bryan Pfohl's priorities. Working with school officials to introduce real-life opportunities for employment to students while providing value-added, educational experiences fosters long-term, mutually beneficial relationships between Carolina Sunrock and the communities we serve.

The folks at Carolina Sunrock support school programs by participating in events that bring us together with educators and students who are looking to make career choices. Ronnie Goswick, Carolina Sunrock's Director of Business and Economic Development, has been a driving force for community engagement by coordinating our participation in school activities such as advisory board meetings, virtual public school videos, job fairs, field trips, graduations and speaking engagements.

The Heavy Equipment and Transportation Technology (H.E.A.T.T.) program at Wake Tech Community College has been one of the focal points of Ronnie's efforts. Having been in operation for 25 years, the H.E.A.T.T. program is the longest running program of its kind in the country. Many programs similar to that of H.E.A.T.T. have not experienced the same longevity, which sets it apart from its competitors. It is also one of 22 such programs to receive Associated Equipment Distributors (AED) accreditation. Each year, Wake Tech selects a few companies to send a speaker to present to two H.E.A.T.T. classes about what their organizations do and the employment opportunities that exist. Speakers are also asked to cover real-world expectations and some desired soft skills required for success.

It has been my honor to represent Carolina Sunrock and serve as speaker to the faculty and students of the Wake Tech H.E.A.T.T. program for the last two years. It is easy to talk to budding technicians and equipment operators about all the great people who work at Sunrock, our operations, our facilities, our fleets, our career opportunities and benefits, and the fleet technical challenges we have overcome. The real challenge is to craft a presentation that adds value to the students' educational experience and reinforces the soft skills that their instructors work so hard to instill. Some of the soft skills covered in the presentation focus on interview etiquette: eye contact, smiling and an excited demeanor, all of which are soft skills that Carolina Sunrock desires in potential employees. Our presentations not only highlight Carolina Sunrock's core values and all the great career opportunities, they also convey real-world technical concepts and information that help students and instructors get a better handle on high-tech equipment and truck issues, all while tying it into the products and services that Carolina Sunrock offers. For example, our presentations cover the importance of trap rock and the role it plays in Carolina Sunrock's products and services.

An important part of each session includes instruction on how to use power words and phrases in a resume, as well as how to present one's self at an interview using a firm handshake, good posture, positive attitude, respectful language and a smile. We then talk about employer expectations as we lead into an open and frank discussion on work ethic, professional behavior and the effects of social media in the work place – the do's and don'ts.

Each session ends with the presentation of Carolina Sunrock hats. As the students exit the classroom, they present themselves to me as if meeting for a job interview. Each student stands up straight, looks me in the eye, gives me a broad smile and firmly shakes my hand with confidence. Each then receives a hat as both a token of appreciation and memento of our time together. However, the value with which the faculty and students hold Carolina Sunrock's contributions is best summed up by Ian Gibbons, the Wake Tech Employer Relations Coordinator, who has

referred to Carolina Sunrock as, "the Gold Standard by which all other companies are measured."

Giving something back to the students and faculty in the form of value-added experiences, real-world technical information, soft skills and a gift creates a familiar bond of trust that is evident months later when participating in the annual Wake Tech H.E.A.T.T. job fair. Being able to give back to the community since 2006 through the H.E.A.T.T. program is a great way for me, both personally and professionally, to give back to an industry that has given me so much. Perhaps, what is most rewarding is to receive so many graduating students' resumes and applications for full-time positions as operators and technicians. In fact, two students of the program have gone on to become Carolina Sunrock employees. Additionally, first year students have also shown great interest in internships and part-time positions. This is just one example of how Carolina Sunrock leads the way.

Luxury Apartments at Foxwood

Blake Montgomery, Market Manager

Carolina Sunrock's work focuses on our local community; we want people to feel at home here in North Carolina. One of Carolina Sunrock's recent projects concentrates on this sense of home, quite literally.

Luxury Apartments at Foxwood is a contemporary apartment community located at 6701 Fox Road in Raleigh, North Carolina. Foxwood is offering one-bedroom, two-bedroom and three-bedroom apartment units with upscale amenities and outstanding services, such as a swimming pool, outdoor grilling sites and a 24-hour fitness center. Carolina Sunrock is supplying concrete and stone to J & R Construction of The Piedmont. This is our first turnkey project together, which is a project that is completed fully functional. Carolina Sunrock will supply over 2,200 cubic yards of concrete from our North Raleigh Plant and over 1,300 tons of clean stone from our Kittrell Quarry for this project.

With Carolina Sunrock's vested interest in growing relationships with customers, we will work hard to secure future projects with J & R Construction of The Piedmont in an effort to help people find their home in North Carolina. We look forward to growing this relationship to help both companies succeed in this competitive, multifamily market.

The Final Lift

Cullen Ports, Market Manager

Carolina Sunrock provided Aviator Site Development with hot mix asphalt for this project from our RDU Facility. With clean curb lines, smooth transitions and high quality asphalt, the job turned out great.

We appreciate the business with Aviator Site Development, along with all the support, and we are looking forward to our next lift of asphalt in the community as summer approaches.

Who does not enjoy riding a bike or driving a vehicle on a newly finished asphalt road or parking lot? From kids racing on bicycles in the streets to adults commuting to and from work, almost anyone can appreciate the smooth feel and clean look of surface asphalt mix.

If you live in the Enclave at White Oak Creek, a subdivision located off of Green Level West Road in Apex, North Carolina, you have just that. Toll Brothers, the builder and developer of this project, chose Aviator Site Development to complete the task. Aviator Site Development just finished the final lift, or layer, of asphalt in this neighborhood.

Crabtree Basin Wastewater System

Chris Petrone, Market Manager

The City of Raleigh is constantly working to improve the community, and Carolina Sunrock is honored to help work toward this goal. Oscar Renda Contracting, Inc., a heavy civil construction company based in Roanoke,

Texas, was awarded the Crabtree Basin Wastewater System Project. To date, this project is the largest infrastructure pipe contract for the City of Raleigh, which is an exciting opportunity for both the City of Raleigh and Carolina Sunrock. An important goal of this project is to improve the capacity of the gravity interceptors within the system. Carolina Sunrock has been supplying all the aggregates for this project. All combined aggregates for this project will be approximately 50,000 tons. This project will allow for an enhanced transportation system of the wastewater. The total contract time for the project is 760 days. We cannot wait to see the completed project!

K-Flex USA Expansion

Greg Johnson, Market Manager

Watching companies adapt and expand is exciting, but helping companies expand is even better.

K-Flex USA is an Italian-based company that is a manufacturer of flexible elastomeric foam, a product that is typically used for insulation. K-Flex recently doubled the size of their operation in Youngsville, North Carolina, with the addition of a 360,000 square foot manufacturing and storage facility. Located in Wake Forest, Focus Design Builders was the general contractor for this project that was completed in just under nine months. Precision Concrete and Layout was the subcontractor in charge of finishing the concrete floors and exterior concrete paving. Carolina Sunrock supplied over 12,000 cubic yards of concrete to Precision Concrete on this project out of our North Raleigh Facility. Carolina Sunrock also supplied approximately 30,000 tons of stone out of the Kittrell Quarry to various sites and utility contractors, which includes Moffat Pipe, located in Wake Forest.

Sunrock supplied over 12,000 cubic yards of concrete to Precision Concrete on this project out of our North Raleigh Facility. Carolina Sunrock also supplied approximately 30,000 tons of stone out of the Kittrell Quarry to various sites and utility contractors, which includes Moffat Pipe, located in Wake Forest.

We look forward to fostering this relationship with K-Flex USA and continuing to watch them grow.

News From Contracting

John Barrett, Vice President and General Manager Contracting

Sandy Forks Road Rehabilitation Project

It's a wrap! After two years of construction, we made it official with a ribbon cutting ceremony on April 19th, 2018, with the City of Raleigh to celebrate the completion of the Sandy Forks Road Rehabilitation Project. Mayor Nancy McFarlane and representatives from Greenroads, a nonprofit corporation that focuses on transportation infrastructure and education on sustainability, gave both their appreciation and congratulations for a job well done to the Carolina Sunrock construction team for the completion of the road work and earning the first Greenroads Silver Certification in North Carolina. This project is also the highest scoring Greenroads project internationally, to date. Thanks to Randy Talley, Trey Clement, Robert "Lurch" Mann, Chris Buck, Ronnie Sigmon Jr. and many others for all their planning and hard work on this outstanding project.

Sunrock team, Mayor McFarlane, Greenroads official

Quality in Construction

In February, Randy Talley and Trey Clement traveled to San Diego, California, to receive a Quality in Construction Award from the National Asphalt Pavement Association for the Sandy Forks Rehabilitation Project. The award highlighted Carolina Sunrock's emphasis on sustainability through the use of reclaimed asphalt pavement in the project, and the award called attention to Carolina Sunrock's efforts for helping the "traveling public."

New Equipment

This winter we added our newest addition to our equipment fleet, a Wirtgen 150 milling machine. Wirtgens allow the removal of surface layers of roads or pavements before laying down new asphalt. This will allow Carolina Sunrock to be more versatile and help us better control our construction schedules.

Training Day

This winter, Volvo Equipment brought their training team from Shippensburg, Pennsylvania, for two paving and compaction training sessions for our paving crews and mechanics. In the morning, classes were held for four days in the new Butner Maintenance Facility. Later in the day, the trainees moved outside for hands-on paver and roller training. This was a great opportunity for our asphalt construction team to brush up on their old paving skills and catch up on the latest Volvo compaction and equipment operation techniques.

CAROLINA SUNROCK NC DEPARTMENT OF LABOR SAFETY AWARDS

Jason Jude, Manager Safety & Health

North Carolina Department of Labor recognized five Carolina Sunrock locations for their outstanding safety performance for 2017. On June 5, 2018, Carolina Sunrock was honored at the safety awards banquet co-sponsored by the N.C. Department of Labor, Granville and Henderson Chambers of Commerce and other organizations. The 30th Annual Safety Awards Banquet was held at the Henderson Country Club in Henderson, North Carolina. NC Department of Labor Commissioner Cherie Berry served as the keynote speaker at the event and presented the awards. Businesses that qualify for the award must meet two requirements. They must be free of fatalities at the site for which they are applying. The site's injury and illness rate also must be at least 50 percent below that of their industry's average rate. The following Carolina Sunrock Operations received awards:

Muirhead Distribution Center- 1st Year Gold

RDU Distribution Center- 1st Year Silver

Carolina Sunrock Hauling- 1st Year Silver

Butner Concrete Plant- 2nd Consecutive Year Gold

Woodsdale Quarry- 7th Consecutive Year Gold

Carolina Sunrock takes great pride in our accident-free workplace. The above awards are a reflection that our "Do the Right Thing" safety process cultivates a safe working environment.

HR Job Fair Involvement

Sherry Hamilton, Human Resources Recruiter

hired and we are still in the process of setting up interviews with other participants for recent job openings. Talk about a homerun!

In addition to hosting our own job fair, Carolina Sunrock regularly attends job fairs throughout our community. On March 28th, Carolina Sunrock also attended the Wake Tech Heavy Equipment and Transport Technology (H.E.A.T.T.) job fair. The students majoring in H.E.A.T.T. met with the following Carolina Sunrock team members: Ronnie Goswick, Leigh Dennis and Trey Clement to learn more about Carolina Sunrock as a company and to gain more information about a future career.

Next, the Orange County Department of Social Services sponsored a spring, community-wide Job & Trade Fair on April 11 in Hillsborough, North Carolina. Sherry Hamilton and Ronnie Goswick partnered with Orange County to greet the talent that stopped by the event and to highlight all the opportunities that Sunrock has to offer.

Lastly, Vance-Granville Community College (VGCC) hosted a Career Day on April 16. Sherry Hamilton and Ronnie

Goswick attended the event to represent Carolina Sunrock. They met with upcoming graduates with electrical, mechanical and welding backgrounds that were interested in pursuing a career in those fields.

Carolina Sunrock values the opportunity to take part in various job fair events. These events allow us to immerse ourselves in our environment and demonstrate to the public both our hard work and commitment to working alongside our community. The ability to partner with local organizations to bring new employees to our company is always exciting.

Job fairs not only provide prospective employees with the possibility to learn about employment opportunities, they are also a chance for companies to share both their values and their work with the community. Carolina Sunrock held our first job fair this year at the Durham Bulls Athletic Park on Saturday, February 3, in Durham, North Carolina. There were over 100 people from all over North Carolina that attended to learn more about career opportunities at Carolina Sunrock. Each prospective employee had a chance to talk to our 30+ managers to discuss the many jobs and projects at Carolina Sunrock. To date, 16 job fair participants have been

Woodsdale Asphalt Plant

Tim Kopec, Operations Manager and Greg Kraemer, Manager Special Projects

The Woodsdale Asphalt Plant brings new opportunities to Carolina Sunrock! With a strong desire to service the Person County and the surrounding areas, Carolina Sunrock has made serious progress toward supporting that goal in the last several months. We erected and put a new asphalt plant into use in 2017 that replaced a former asphalt plant. Carolina Sunrock purchased the plant in Arkansas, and a team of Sunrock employees moved the plant to Woodsdale. Greg Kraemer added a combination of parts from Barber Green, Stansteel, Telsmith and Gencor to design it for our

specific purposes. The plant was put into operation at the end of last season to supply asphalt for our Contracting Division's Person County road improvements. Additionally, Carolina Sunrock hired Focus Design Builders, located in Wake Forest, North Carolina, to construct two new buildings that support plant operations and the quarry. The first building houses the quality lab for all activities (asphalt, concrete and aggregate), a break room, a large storage garage and two large maintenance bays for equipment and truck repair. The second building houses the motor control

centers and all operational controls for both plants. The asphalt plant is open for the season for contracting, and we are optimistic the market will be stable. We have added additional employees to ensure that the plant runs smoothly, such as a plant utility position, loader operator, and production manager for the area. In the future, we anticipate adding a plant supervisor position for the area and a quality control position for the testing of the asphalt as well. The plant utilizes the raw materials that the Woodsdale Quarry produces and has the potential to use moderate to high percentages of recycled asphalt.

Sunrock's 9th Annual RMC Rodeo

Eddie Ellis, Assistant Manager Safety & Health

Carolina Sunrock's 9th Annual Ready Mix Concrete (RMC) Rodeo was held at the North Raleigh facility on April 21, 2018. This competition recognizes individuals with exceptional skills who deliver the world's most versatile building product. The Truck Rodeo allows our Concrete Delivery Professionals (CDPs) to display their knowledge and skills while operating a mixer truck. This event challenges our drivers to be the "Best of the Best" Ready Mix Concrete drivers. The rodeo competition consisted of a cumulative score derived from a driving challenge course and a visual vehicle inspection.

Carolina Sunrock's 2018 competition was very competitive this year. The RMC Rodeo featured drivers Scott Elliot-RDU, Bernard Roberts-North Raleigh, Joey McNeil-RDU, Demetric Daniel-Butner, Bennie Wilson-RDU, Artie Wright (Egg Drop Winner)-Kittrell. Phillip Frame claimed 1st place, Shannon Tapp claimed 2nd place and Mark Constant claimed 3rd place. Phillip Frame and Shannon Tapp represented Carolina Sunrock on May 5, 2018, at the Carolinas Ready Mix Concrete Association (CRMCA) 11th Annual Mixer Driver Rodeo in Davidson, NC. Carolina Sunrock is extremely proud of all who participated in these events.

We would like to thank all of the driver participants, volunteers and family members who came out and made the 2018 RMC Rodeo a success.

On the behalf of Carolina Sunrock, we would like to congratulate Shannon Tapp for competing in the CRMCA Rodeo on May 5, 2018. Shannon finished 1st place for North Carolina. In addition to finishing in 1st place, Shannon had the highest overall score for North Carolina and South Carolina participants. Shannon won a cash prize of \$1,000.00, and he will represent North Carolina in the National Ready Mix Concrete Association (NRMCA) Rodeo. This event will be held in Washington, D.C., on September 29, 2018. He has joined an elite group of past and present CDPs with this accomplishment. Again, we would like to congratulate Shannon Tapp for a job well done and wish him the best of luck at the NRMCA Rodeo in September.

Safety Stand-Down

Jason Jude, Manager Safety and Health

Carolina Sunrock was proud to participate in the Occupation Safety and Health Administration's (OSHA) National Safety Stand-Down from May 7-11, 2018. The purpose of this event is to raise awareness and to prevent falls in construction and other related industries. Data from the Bureau of Labor Statistics shows that of 991 construction fatalities, 370 of them were from elevated falls. This statistic proves that falls are, and will continue to be, a leading cause of death within the construction industry if no action is taken. These fatalities can be avoided, so OSHA conducts this event to create a dialogue between companies and their employees about preventable measures. All companies that participate receive a certificate. As part of the National Safety Stand-Down, our employees focused specifically on "Fall Hazards," anything that can cause an employee to lose their balance, and reinforcing the necessity of "Fall Prevention," measures put into place to ensure that "Fall Hazards" are prevented, to do our part in keeping our employees safe at all times.

2018 Carolina Sunrock Interns

Hunter Caro, a freshman studying biology at the University of South Carolina, is working as the Asphalt Intern. He came into this job hoping to learn new skills and meet new people, and so far the job is exceeding his expectations. The people have been great, and he has developed his workforce skills as well. When he is not at work, Hunter enjoys playing sports, spending time with friends and being outdoors.

Hayden Carraway is currently a student at East Carolina University studying business management. Through his internship working in the Butner Shop, Hayden hopes to gain valuable experience working in this diverse setting. He also wants to observe business in action and see the interactions between different departments as they all work together toward achieving the same goal. In his free time, Hayden enjoys playing sports, kayaking, canoeing, outdoor activities and working with children at youth camps.

Christian Gruebel is a rising sophomore at UNC Charlotte and a business major. Christian is the Quality Control/Field Services intern. As Christian just finished his first year at UNC Charlotte, he is still uncertain of his career path, but he hopes to be successful in whatever he pursues. Through his internship at Carolina Sunrock, Christian hopes to gain work experience while making connections with the variety of employees who work here. Some of his hobbies include watching football and playing video games.

Sydney Jones, a rising senior, is majoring in Spanish and advertising at UNC Chapel Hill. Sydney is working as the Communications Intern, assisting with the social media pages for Carolina Sunrock. She hopes to gain experience managing accounts for various social media platforms, while bringing Carolina Sunrock's story to the forefront of the community. Sydney hopes one day to work for an interactive advertising agency and help other companies to deliver their story to the community. Some of her hobbies include hanging out with friends and reading.

Trey Lowery is a rising sophomore at East Carolina University and is working as the Contracting Intern. As a construction management major, he hopes to gain knowledge and experience regarding work on construction sites. Upon graduation, Trey would like to become a Project Manager and oversee various job sites. Some of his hobbies include hunting, fishing and golfing. He also enjoys playing baseball, which he played at Granville Central High School as a member of the varsity baseball team, where he was the captain for three years.

2018 Carolina Sunrock Interns

Craig Rambeaut is working as the Contracting Intern. He plans to one day own a land clearing business, so his work on the grading side of the business is very beneficial. Through his internship, Craig hopes to learn about all of the various pieces of equipment, how they operate and each piece of equipment's function, so that he can increase his overall knowledge of the operation. In his free time, Craig enjoys fishing, hunting and being outdoors.

Anastasia Shymonyak is working as the Legal Intern this summer. She is currently a student at North Carolina State University in the Exploratory Studies program, and intends to study business administration. Anastasia hopes one day to work for an international company, so that she can travel and expose herself to other cultures while working with a team on large projects. In her forties, she plans to be an entrepreneur and own her own salon. Through her internship with Carolina Sunrock, Anastasia hopes to learn about the expectations and necessities of the workforce, maintain her technological skills, network and explore new areas of interest along the way. Her hobbies include tennis and all things related to cosmetology.

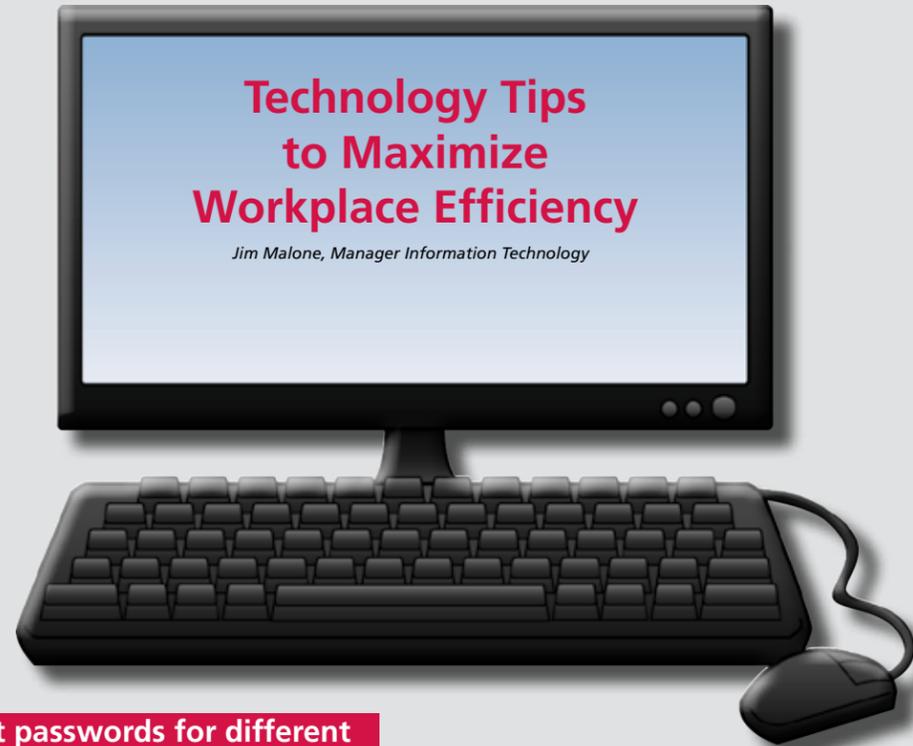

Tyrell Thorpe is our Kittrell Quarry Intern and a recent high school graduate who is headed to college this fall to study computer science engineering. Some of his hobbies include fishing, dirt biking, camping and fixing broken phones. His skills include mechanics, oil changes, brake and tire replacements, motor repair and phone screen replacements.

Robbie Walt is working as the Contracting Intern. He is a rising senior at UNC Chapel Hill majoring in management and society. Robbie is originally from Greensboro, but moved to Chapel Hill this past fall after transferring from Rockingham Community College. Working with his hands has always been fun for Robbie- he started flipping cars when he was 12 years old. Robbie has since worked in construction, auto mechanics, welding and fabrication. The opportunity to work for Carolina Sunrock interested Robbie because of the chance to learn about a different aspect of the construction industry, and Carolina Sunrock's unique vertical integration was also intriguing. Robbie is looking forward to completing the rest of his internship and committing himself to learn new knowledge that he can carry on to his future endeavors.

Bria Williams is the Human Resources Intern. Her undergraduate degree is in psychology from Elon University. She is currently attending North Carolina A&T State University as a Masters of Business Administration-HR Candidate. After graduating, Bria would like to work in HR, most likely involving recruiting or employee relations. Through her internship, Bria hopes to gain a better understanding of every aspect of HR. For fun, she enjoys painting and running.

Have different passwords for different security levels

If you have only one password across all of your accounts, you put all of those at risk if one account becomes compromised. The stakes can be high at work, where you may be dealing with sensitive client and/or employee information.

Get to know your IT policies

Spend some time reading the IT policies for your work place. Although there are common threads across most businesses, there will be some nuances that are particular to your job and working environment. Your employer is entitled to monitor your IT use if explicitly stated within the employer's company policy. Being familiar with what you can and cannot do may, at the least, save you a little bit of embarrassment, and even save your job.

Use the automatic save feature in Microsoft Office to protect your projects

There are times when Microsoft Office closes a program before you can save changes to the file you are using. If the power goes out or if one of your programs stops working, you could lose part of the file you were working on. The automatic save feature allows you to save your work more frequently than every fifteen minutes. To enable the automatic save feature, click File, Options, Save and make sure the Save AutoRecover information every x minutes is selected.

Printer supplies

If you happen to run the printer out of toner or ink, do not leave it for someone else to replace. Do it yourself. If you end up using the last of the printer supplies from the stock cupboard, make sure you tell or email the person responsible for ordering replacements. Don't assume that someone else will do it. The same goes for paper and/or if you see any unusual flashing lights on a printer (they usually mean something).

Large print jobs

If you are going to send a large print job to a printer that will tie it up for more than a few minutes, when possible, do this:

- print on a printer that is rarely used, so it will not be noticed;
- print at a time when others won't mind;
- print after you've given your colleagues a warning.

SUNROCK®
VALUES

Opportunity for ALL Team Members

Do the Right Thing

The Market is Boss

Excellence through Integrity, Execution, Innovation

Excellence through Integrity, Execution, Innovation

- This is the foundation of our shared Sunrock values, and ultimately, our success. To us, excellence means **best in class**.
- At Sunrock we achieve excellence through integrity, execution, and innovation in our work.

Do the Right Thing

- We believe our commitment to excellence is achieved by consistently acting in ways to ensure we do the right thing.

The Market is Boss

- We understand that the market dictates many of our business decisions as well as demand for our products and services.
- Understanding and respecting this principle reinforces our commitment to excellence through integrity, innovation, and execution.

Opportunity for ALL Team Members

- At our core we believe that all team members should have the opportunity to learn, contribute, make a difference, and have a solid future at Sunrock.

Equal Employment Opportunity

Sunrock Group Holdings Corporation and its affiliated companies (hereinafter referred to as "Sunrock") are committed to providing a work environment that is free from all forms of harassment, discrimination and inequality. We recruit, employ, train, promote and compensate our personnel without regard to race, color, age, gender, gender identity, gender expression, sexual orientation, religion, national origin, citizenship, marital status, veteran's status, disability, genetic information or any other personal characteristic protected by law. This extends to the employment relationship and other areas of personnel activity, such as recruiting, selection, job assignment, supervision, training, promotions, job grading, transfers, terminations, compensation, benefits, educational opportunities, recreational activities and work facilities. Sunrock recognizes its obligation to actively promote such opportunities for all qualified persons and will take reasonable and necessary action to promote these objectives.

Sunrock takes pride in maintaining a diverse environment. We value each and every employee and strive to make employment at Sunrock enjoyable and satisfying. We will be proactive in monitoring our employment practices and policies on an ongoing basis. We expect you to be aware of your work environment, as well, and be respectful to all individuals around you. If you are subject to or witness inappropriate workplace behavior, please contact your manager or your Human Resources Department immediately. As a supervisor or manager, you are required to report any complaints or observations of inappropriate workplace behavior.
